

Carbon Reduction Plan

Supplier name:Una Health Ltd.....

Publication date:Sept 2024.....

Commitment to achieving Net Zero

Una Health is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Una Health Ltd operates from premises located in Stoke-on-Trent, with staff located both on-site as well as field-based sales representatives covering the UK.

Baseline Year: 2023	
Additional Details relating to the Baseline Emissions calculations.	
Una Health started reporting emission data for 2023, including scope 1 and scope 2 and a subset of scope 3. Our scope 3 emission data is outlined below, which we endeavour to improve upon with our delivery providers and waste disposal provider.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	16.21
Scope 2	3.31

<p>Scope 3 (Included Sources)</p>	<p>20.53</p> <ul style="list-style-type: none"> • Business travel: 2.00 • Waste disposal: We are in discussions with our waste disposal provider to have a full report of our waste data so we can include this in our emissions data going forward. • Employee commuting: 16.31 • Upstream transportation: <ul style="list-style-type: none"> ○ DHL: 2.21 ○ Other couriers: we are working with our other courier providers to include emission data for all other operations going forward. • Downstream transportation and distribution <ul style="list-style-type: none"> ○ DHL: 0.008 ○ Other couriers: we are working with our other courier providers to include emission data for all other operations going forward.
<p>Total Emissions</p>	<p>40.05</p>

Current Emissions Reporting

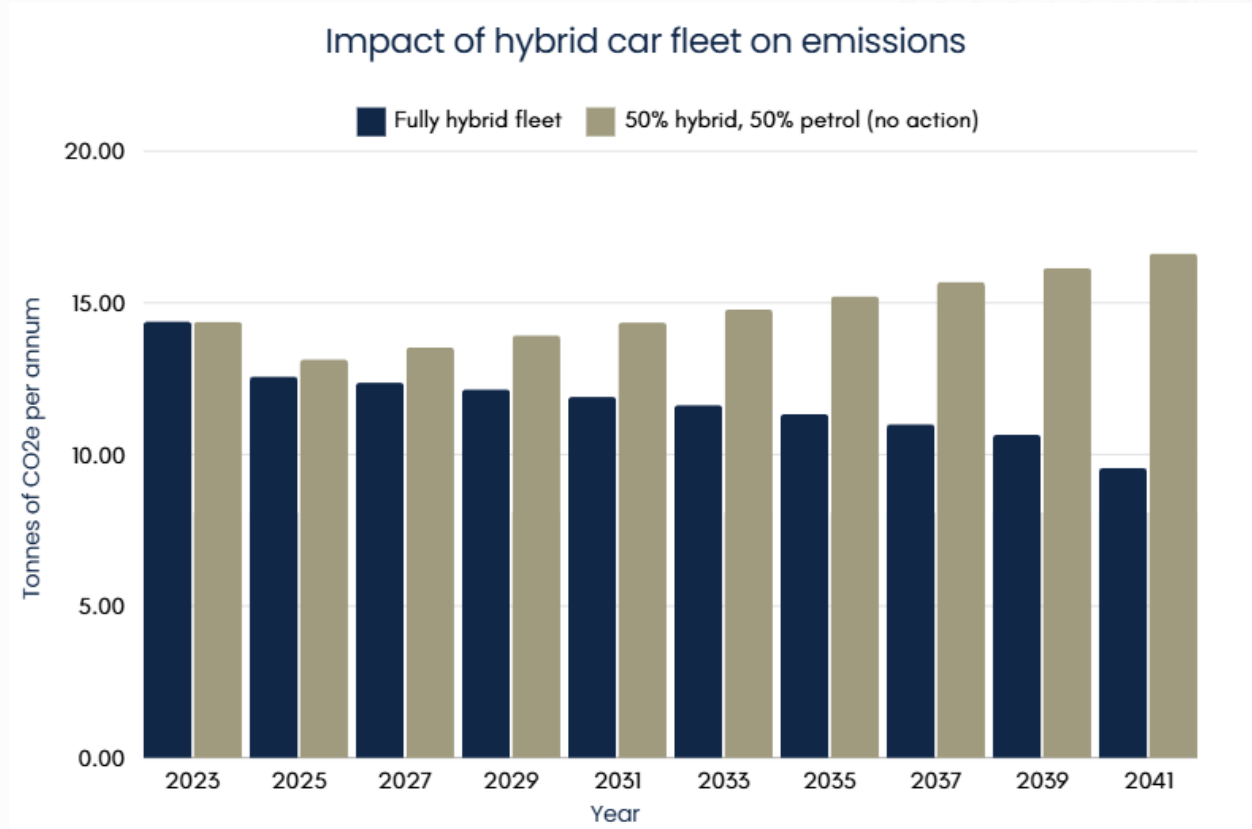

Current emissions is the baseline (see above).

Emissions reduction targets

Una Health has made steps to increasing the amount of hybrid cars in our fleet, with 50% hybrid in 2023. To continue our progress to achieving Net Zero we will endeavour to increase this further, with an aim to have a 100% hybrid fleet by 2041.

We project that this will decrease our fleet emissions from a projected 16.63 tCO₂ without action to 9.55 tCO_{2e} by 2041, a decrease of 43%.

Factors in expected workforce increase in 2024-25 and 3% increase in miles every other year due to increase in workforce.

Carbon Reduction Projects

Una Health increases premise size in Stoke-on-Trent in 2024, to support expanded growth and better support our customers through enhanced warehouse and office facilities. It is therefore expected that our emissions may increase due to this, but we are putting in place initiatives to achieve our Net Zero target.

Carbon Reduction Initiatives

In the future we hope to implement further measures such as:

- In January 2024, Una Health expanded office space to accommodate company growth. Initiatives are in place to make the premises more energy-efficient. Examples include LED energy efficient lighting.
- Operations will endeavour to simplify and reduce upstream shipments, especially from overseas.

- Recycling projects and sustainable packaging to reduce waste. Una Health will look into more compact packaging to reduce space required during shipping.
- Recycling bins will be placed around site to encourage more recycling.
- Reducing office printing.
- Education of our workforce to participate in decarbonisation of the company.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
