

QUALITY CONTROL

BROCHURE

We specialise in pathology and point of care diagnostics; supplying specialist, innovative and appropriate healthcare solutions.

UNA HEALTH

INTRODUCTION

Often, better healthcare is less about pioneering breakthroughs or techniques and more about finding ways to better use existing technology to improve outcomes. And that's what Una Health is all about; taking an innovative approach to diagnostics to revolutionise the patient pathway and improve the overall patient journey. We specialise in pathology and point of care diagnostics; supplying specialist, innovative and appropriate healthcare solutions. We offer exceptional levels of experience, expertise and support. However, our real skill is in combining leading technology with a different way of thinking, to provide rapid, reliable results that make more efficient use of already-stretched resources.

We are focused on revolutionising the patient journey; because we believe that rapid diagnostics can support a flexible, accessible service for patients. Over the years we have built up a strong portfolio of reliable products and are always looking to improve on what we can offer, whether that be ensuring the most up to date software is available or sourcing pioneering products best suited to the job.
