AUTOMATED ELISA SOLUTIONS

for all your Enteric and Serology needs

Dynex, TECHLAB® & Fortress Diagnostics

Una Health and Aspect Scientific have partnered to deliver best-in-class ELISA automation for Enterics, Infectious disease, Immunology and Biochemistry assays.

Combining market-leading **DYNEX ELISA** automation systems with Gold Standard **TECHLAB® Enterics** and the **Fortress** range of assays couldn't be easier

ABOUT ASPECT SCIENTIFIC AND DYNEX

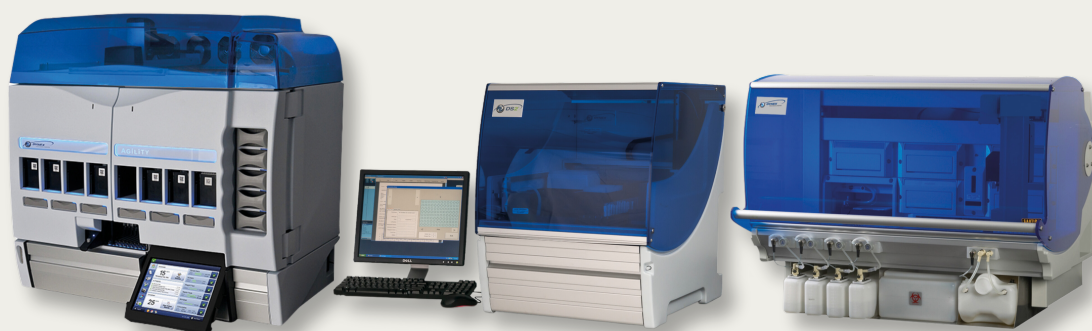

Aspect Scientific are the UK partner, distributor and service provider for Dynex Technologies and their market-leading range of ELISA Automation Systems.

Combining flexible, powerful and open platform automation systems with specialist comprehensive technical service and support to automate your microplate assays. Allowing you to implement efficient, standardised, accurate and faster testing processes within your laboratory and greatly reduce manual workload while also ensuring you deliver on your service demands and turn-around times.

DEDICATED SUPPORT TEAM

Dynex highly reliable and market-proven instrumentation is coupled with our expert Technical Support, Service and Training which is provided by Technical Support Specialists, field-based ELISA Applications Specialists and experienced Service Engineers across the UK.

Our Dynex certified, specialist team deliver the quality of support and service that the equipment manufacturer recommends.

From single microplate readers and washers, up to fully automated 2, 4 & 12 plate systems delivering complete sample-in/results-out walk-away automation, we offer a range of fully supported solutions and instrumentation designed to fit your workload, your budget and your ELISA application.

Ensuring complete peace of mind that your critical analyser is maintained by the experts, to provide complete reliability, confidence and accurate results.

Dynex's market-leading automation is paired with Una Health's extensive range of **ELISA assays**

YOUR TRUSTED DISTRIBUTOR **ABOUT UNA HEALTH**
